Sept 17,1925.

Supervisor of Radio
Federal Bldg.
Chicago, Ill.

Dear Sir:

The Milwaukee Radio Amateur's Club Inc. is interseted in broadcasting code lessons for the benefit of beginners.

As Secy-Treas of this club I would like permission to send these from my station, 9EKR.

At present my station uses one UV 203 tube with 71 watts D.C. input on 40 Meters.

Owing to the fact that this service is for the city of Milwaukee only, I could cut my input down to a low value-say 15 watts and thus climinate the possibility of unnecessary interference.

I might add that these broadcasts would cover a maximum time of 10 minutes two or three nights each week.

Hoping to hear favorably from you in this matter, I remain,

Very truly yours,

Secy-Treas.
